Art Unit: 3634

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-15 and 21-23, drawn to a method of assembling a threshold, classified in class 49, subclass 506.
- II. Claims 1-8 and 16-20, drawn to a threshold assembly, classified in class 49, subclass 467.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as providing a telescoping substrate section which extends a desired length, then mounting a sill to the substrate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
